Attn: Larry Senkel

Dear Mr. Senkel:

We at Hensel Phelps Construction Co., Central Los Angeles Learning Center, would like to acknowledge the achievements Pro Steel Erectors, Inc. (Pro Steel) had made in regards to their overall performance on the steel erection on this project.

We understand the difficulty in implementing and maintaining an effective erection plan of this magnitude on a fast track schedule.

Pro Steel has allocated the necessary resources, shown a genuine concern and demonstrated commitment to completing the structural steel erection within the scheduled allotted time while adhering to a quality safety and QAQC program while enforcing the policies that were critical to these tasks.

This was and is a unique project with a difficult schedule. The structural steel portion included in excess of 9000 erectable pieces making up 336 semi loads and weighing over 6000 tons. This was erected in less than the 120 day schedule.

Hensel Phelps Construction Co. sincerely appreciates this worthy effort.

Respectfully,

HENSEL PHELPS CONSTRUCTION CO.

Jeff Stewart
General Superintendent
